Parlez-Vous Francais? Probably not unless you grew up in a French speaking home or you studied for hours in High School. In an ever increasing global society it is becoming more critical to learn and teach our kids different languages at an early age.

[Little Pim](#) is an award-winning foreign language immersion DVD series for babies, toddlers and preschoolers. They currently offer three theme-based DVDs that use both animation and real kids to introduce words and phrases for everyday activities. Each program is available individually or in a discounted three-disc set in Spanish, French, Chinese, and English (ESL).

The title character, an animated Panda Bear named Little Pim, introduces conversational words and phrases, which are in a stimulating visual context for children and also written on the screen for the parents or caregivers. Little Pim engages young viewers with his own playful antics and images of real children enjoying everyday activities. Each Little Pim DVD focuses on the first words and phrases typically acquired in a toddler's primary language. This familiar vocabulary enables your family to easily repeat the new language during your own daily routines.

Little Pim is the recipient of many awards including the iParenting Media Award. Visit [Little Pim](#) and watch a snippet of their videos and you won't be disappointed.
